Your Partner in Financial Discipline, Visibility & Growth

- **No Proper Accounting Support:**
No structured accounts team to handle operations and compliances.
- **Weak Systems**
An accountant is there, but no proper software to capture the full scope of transactions.
- **Lack of Processes**
Accounts and software exist, but no SOPs, no employee role clarity, poor month-end closing, and no visibility for managers.

What Small & Medium Enterprises Face While Scaling

- **No Financial Intelligence**
ERP and accountants exist, but management doesn't know which KPIs truly matter to make future decisions.
- **No CFO Guidance**
Structured systems and KPIs are in place, but no CFO to analyze, interpret, and suggest improvements.
- **System Flow Inefficiency**
Duplication of work, excessive manual effort, and rising costs due to poor automation.

What Happens?

- Management is unclear about actual profits.
- Reported profit does not match real cash flow.
- Money gets stuck in working capital.
- No clear financial ratios to track performance.
- Investors lose trust due to poor visibility.
- IPO or funding goals fail when financials are not up to standard.

The PFA Global Solution

- **CFO Services:**
Strategic financial planning, performance analysis, KPI dashboards, investor reporting.
- **Automation & Process Structuring**
ERP implementation, SOPs, automated flows, data connectors, and reduced duplication.
- **Visibility Partner**
Monthly MIS reports, business health checks, benchmarking, and transparent dashboards.
- **Scaling Partner**
Preparing businesses for due diligence, investor entry, and even IPO-readiness.
